

‘Control’

Control

- Simple piece of price action

Control

- Simple piece of price action
- You'll be able to find it just by looking

Control

- Simple piece of price action
- You'll be able to find it just by looking
- Shows which force is dominant in the market – the buyers or the sellers

Control

- Helps to gauge strength when used with MOR

Control

- Helps to gauge strength when used with MOR
- Shows you when trades are likely to run for bigger profits

Control

- Helps to gauge strength when used with MOR
- Shows you when trades are likely to run for bigger profits
- Shows you when to be cautious and aim for smaller profits

Control

- Observe daily swings – swing highs/swing lows

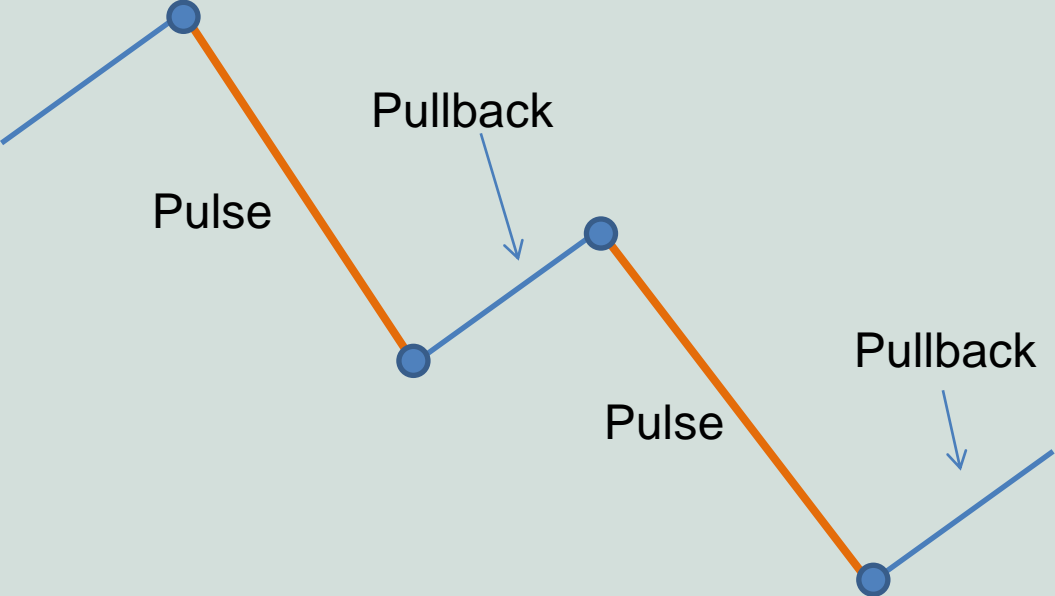

Control

Control

- Observe daily swings – swing highs/swing lows
- Pulse, pullback, pulse, price action

Control

Control

- Control is shown where a 'pulse' move dominates a swing high or swing low

Control

Control

- When pulse moves dominate the swing lows the sellers have control

Control

- When pulse moves dominate the swing lows the sellers have control
- When pulse moves dominate the swing highs the buyers have control

Control

- It is healthy to see pullbacks in a trending market

Control

- It is healthy to see pullbacks in a trending market
- But when a pullback turns into a new pulse move control has changed hands!
