

# The 3 Cornerstones of Trading

**There are three areas we need  
to address before you step out  
to trade with success**

**You might think it's all about  
just placing buy and sell orders  
at the right time**

**And ultimately it is...**

**But there's a whole lot more  
going on under the bonnet  
that'll let you do that most  
effectively**

**Here's what we'll need to  
look at...**

# **1. Mindset**

## **2. Money Management**

## **3. Trading Methods**

**I arranged them in order of  
priority...**

**So does it surprise you that something as intangible as 'mindset' has the greatest effect on trading profitably?**

**I know you're probably  
interested in getting straight to  
the meaty stuff...**

**Finding entry signals that tell  
you when to pull the trigger**

**And we'll get to all that soon  
enough**

**But I just want to get this point  
across to you at this early  
stage...**

**This is the order in which to  
work on improving your  
abilities as a trader...**

**First Mindset then  
Money Management and  
finally Methods**
